                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          cc involves conferring to transferred cells the ability to metabolise cc arabitol, ribitol and/or mannitol. The positive selection method is cused in positively selecting transgenic cells from a population of cells cc used in positive selection method, the presence of the gene of cells interest in the genetically transformed cells may be determined without the disadvantages associated with traditional negative selection cc systems. Positive selection of the transformed cells is achieved without creatly damaging the neighbouring non-transformed cells. The cuse of a separate assay to determine the presence of a marker gene. This technique also avoids the release of antibiotics or other dangerous genes into the environment. The present sequence is Escherichia coli strain C ribitol transporter encoded by ribitol operon (rtl operon). The operon also encodes ribitol dehydrogenase and ribitol kinase.
                                                                                                                                                                                                                           δ
                                                                                                                                                                                                                                                                                                                                                                             밁

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ABN90538 to ABN93374 represent Stapnylocucus critical acid sequences frame (ORF) nucleic acid sequences which encode the amino acid sequences given in ABP35124 to ABP37960. The S. epidermidis sequences have antibacterial activity and can be used in gene therapy. The sequences can also be used in the diagnosis and treatment of bacterial infections, particularly S. epidermidis infections. The sequences can be used to screen for compounds ableit infections. The sequences can be used to screen for compounds ableit infection.

N.B. The sequence data for this patent did not form part of the printed specification, but was obtained in electronic format directly from the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             14-AUG-1997;
08-NOV-1997;

                                                                                                                                                                                                                                                                                                                                                                                                       The present invention provides a number of nucleotide and protein sequences from the Coryneform bacterium Corynebacterium glutamicum. These are useful for identifying the mutation point of a gene derived from a mutant of coryneform bacterium, measuring expression amount and analysing the expression profile or expression pattern of a gene derived from Coryneform bacterium, and identifying a homologue of a gene derived from coryneform bacterium. Coryneform bacteria are useful for producing amino acids, nucleic acids, vitamins, saccharides and organic acids, particularly L-lysine. The present sequence is a protein described in the executive of the first sequence is a protein described in the executive of the first sequence is a protein described in the executive.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Coryneform bacterium; amino acid synthesis; vitamin; saccharide; organic acid synthesis.

17-DEC-1997;
                                                                                            can also be used to control growth of the microorganism. Chlamydia trachomatis is responsible for a large number of diseases, e.g. eye diseases such as conventional trachoma, nonendemic trachoma, paratrachoma, and inclusion conjunctivitis; genital diseases such as nongonococcal uretritis, epidymitis, cervicitis, salpingitis, perihepatitis, bartholinitis; pneumopathy in breast feeding infants; and venereal lymphogranulomatosis. The polypeptides of the invention
                                                                                                                                                                                             AAY36754-Y37949 are encoded by open reading frames (ORFs) of the genome of Chlamydia trachomatis (see AAZ01425). The polypeptides can be used as vaccines against Chlamydia trachomatis. Antisense and ribozyme sequences
                                                                                                                                                                                                                                                                                                               WPI;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   paratrachoma; inclusion conjunctivitis; genital disease; perihepatitis; nongonococcal uretritis; epidymitis; cervicitis; salpingitis; bartholinitis; pneumopathy; venereal lymphogranulomatosis.
                                                                                                                                                                                                                                                                                                                                           Griffais
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Chlamydia trachomatis.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          CC Also described are: (1) nucleotide sequences (II) encoding (I); and (2) CC vaccines against P. falciparum infection comprising (I) or (II). CC (I) and (II) are useful for the development of vaccines against CC P. falciparum infection. (I) and polyclonal antisera or a monoclonal CC antibody raised to immunogens comprising the sequences of (I), are CC useful in the detection of infection with P. falciparum. Furthermore, CC (I) (especially when they are rifins or secreted or membrane proteins) CC can aid the identification of drugs to treat or prevent P. falciparum CC infection, or they can be used to identify drug resistance in CC p. falciparum. Sequencing of the Plasmodium chromosome 2 and the CC subsequent identification of proteins encoded by it will help to expand CC our understanding of parasite biology, a process hampered by the CC complexity of the parasite biology, a process hampered by the CC vaccine and drug development. Parasite resistance to drugs and mosquito CC resistance to insecticides have led to a resurgence of malaria in many CC parts of the world, and there is a pressing need for vaccines and new CC crossitance to AAA70078 to AAA70287 and AAB18144 to AAB18352 represent nucleotide and protein sequences given in the present invention, but which are not conscient and within the present invention, but which are not conscient and within the present invention.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The invention relates to determining whether a candidate nucleotide (ABA82938-ABA82971) or polypeptide (ABA9236-ABB47296) encodes/functions as a multidrug resistance (MDR) efflux pump comprising, searching a database for sequences high identity known MDR efflux pumps and then deleting/mutating an identified region of the DNA in a bacterial cell and determining whether the bacterial cell exhibits increased or decreased sensitivity to an antibacterial agent The identified pumps are useful for further identifying MDR efflux pumps that may be used as drug targets to increase the sensitivity of cells to antibacterial agents. Cells comprising the identified pumps may be used to screen for potential blockers or inhibitors of MDR pump function or gene expression.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Claim
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Determining whether a candidate nucleotide or polypeptide encodes/functions as a multidrug resistance (MDR) efflux j searching a database of nucleotide/polypeptide sequences high identity to known MDR pumps -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       12-APR-2001; 2001WO-US12230
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       WO200179257-A2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Davis

The nucleic acid sequence is useful in the detection and/or amplification nucleic acid sequence is useful in the detection and/or amplification nucleic acid sequence, particularly to identify Lactococcus lactis or related species. The proteins of the invention are useful for the biosynthesis or biodegradation of a composition of interest. The
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  invention helps research in lactic bacteria, particularly production of yogurt and cheese.

                                                                                                                                                                                                                                                                                                                                                                  from Pseudomonas mendocina KR-1. The protein increases resistance to solvents and antibiotics, and is used particularly for constructing strains that produce p-hydroxybenzoic acid. Overexpressing the efflux system or its expression from a plasmid vector increases resistance of bacteria to a variety of toxic substances, while inactivating an efflux
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Chen

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                            Pseudomonas efflux proteins in the transformed host cell relative to expression levels of an untransformed host cell. (I) is useful for isolating cDNAs and genes encoding a homologous putative efflux 4.5x gene from the same or other bacterium species. (I) is useful as a restriction fragment length polymorphism (RFLP) marker, and for carrying out nucleic acid amplification-based methods of genetic and physical mapping. (I) is useful for probing an organism's efflux system to gain an understanding of the mechanism of solvent tolerance.
                                                                                                                                                                  The present sequence represents a putative efflux protein, designated 4.5x, isolated from Pseudomonas mendocina KR-1. The putative efflux 4.5x gene (I) is located immediately downstream of the pobA gene in Pseudomonas mendocina KR-1. The present invention also describes: (1) a chimeric gene (II) comprising (I) operably linked to at least one suitable regulatory sequence; (2) a transformed host cell (III) comprising (II); (3) isolation of (I); and (4) a complement of (I). (II) is useful for altering the level of expression of Pseudomonas efflux protein in a host cell by transforming the cell with (II), and growing the transformed host cell produced under conditions that are suitable for expression of (II), resulting in production of increased levels of
                                                                                                                                                                                                                                                                                                                                                                                                                            Novel isolated Pseudomonas efflux polynucleotide, useful for probing organism's efflux system to gain understanding of the mechanism of solvent tolerance and as restriction fragment length polymorphism
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Chen KK;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         solvent tolerance.
                                                                                                                                                                                                                                                                                                                                                                            Claim 1;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                cc streptococcus/GBS (Streptococcus agalactiae) or group A streptococcus/GAS cc (Streptococcus/GBS (Streptococcus byogenes), comprising one of 5483 sequences (S1), given in ct the specification. The proteins have antibacterial and antiinflammatory cartivity. (I), nucleic acids encoding (I), ABN66044-ABN71526 and cantibodies that bind (I) are used in the manufacture of medicaments for the treatment or prevention of infection or disease caused by Streptococcus bacteria, particularly S. agalactiae and S. pyrogenes. Cc. Nucleic acids encoding (I) are used to detect Streptococcus in a cc. biological sample. (I) is used to determine whether a compound binds to cc. (I). A composition comprising (I) or a nucleic acid encoding (I), may be used as a vaccine or diagnostic composition. The disease caused by Cc. Streptococcus that is prevented or treated may be meningitis. Nucleic acid encoding (I) may be used to recombinantly produce (I) and may be used in gene therapy. Antibodies to (I) are used for affinity corrections profering streptococcus professes, and distinguishing/identifying cr.

                                                                                                                                                                                                                                                                                                                                        The present sequence is a Pseudomonas stutzeri open reading frame-N (ORF-N) protein. The Pseudomonas stutzeri genome includes ORFs that encode enzymes required for biosynthesis of pyridine-2,6-bis (thiocarboxylate) (PDTC). The ORFs encoding PDTC are especially useful in environmental remediation methods, e.g. phytoremediation, bioaccumulation, water purification, waste water purification, solution mining mobilisation, immobilisation, detoxification, redox state modifier or modification of metal ion reactivity. In particular, the ORFs are useful for degrading carbon tetrachloride and removing metals from substrates, e.g. soil, or water.
                                                                                                                                                                                                                                                                                                                 Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Claim 32; Page 100-101; 172pp;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              New isolated nucleic acids, useful for producing enzymes required to produce pyridine-2,6-bis (thiocarboxylate), especially useful for reducing the amount of metal or carbon tetrachloride in a substrate,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              19-JAN-2001; 2001WO-US02386

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             5
                                                                                                                                                    for biosynthesis and biodegradation, especially biosynthesis of Vitamin B12. The genome sequence and proteins encoded by it are also useful for selecting compounds that regulate gene expression and cell replication and modulate L. monocytogenes-related diseases. In addition, the genome sequence and proteins encoded by it are useful in pharmaceutical and vaccines compositions for the treatment or prevention of infections by I
                                                                                                                                                                                                                                                                                                                                          The present invention relates to the genome sequence of Listeria monocytogenes EGD-e (see ABA03041). The genome sequence and fragments it are useful for selecting probes and primers for detecting genes in monocytogenes and related organisms, and for studying genetic polymorphisms and other genomes. The present sequence is a protein encoded by the genome sequence of the present invention. Proteins expressed from the genome sequence are useful for raising specific antibodies, identification of L. monocytogenes and related organisms, for heavetherical and bidges and the constalls his contribution.
                                                    monocytogenes and related organisms.

Note: The sequence data for this patent did not form part of the printed specification, but was obtained in electronic format directly from WIPO
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Chakraborty T, Domann E, Perez-Diaz J, Baquero F, Maduenio E, De Pablos B,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Genomic sequence for Listeria monocytogenes, useful e.g. for and prevention of Listeria and related bacterial infections,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   11-APR-2001;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Listeria monocytogenes
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Antibacterial; vitamin B12; b
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  05-FEB-2002

                                                                                                                                                        antibacterial activity and can be used in gene therapy. The sequences can also be used in the diagnosis and treatment of bacterial infections particularly S. epidermidis infections. The sequences can be used to screen for compounds able to interfere with the S. epidermidis life
                                                                                                                                                                                                                                                                      ABN90538 to ABN93374 represent Staphylococcus epidermidis open reframe (ORF) nucleic acid sequences which encode the amino acid sequences in ABP35124 to ABP37960. The S. epidermidis sequences have
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     AAF67743 to AAF68080 encode the Corynebacterium glutamicum membrane construction and membrane transport (MCT) proteins given in AAB76510 to AAB76847. The MCT nucleic lacids and proteins are useful in the identification of microorganisms which can be used to produce fine chemicals, for modulating fine chemical production in C. glutamicum or related bacteria (e.g. Brevibacterium lactofermentum), the typing or identification of C. glutamicum or related bacteria, as reference points for mapping C. glutamicum genome, and as markers for transformation.

AAF68082 and AAF68082 represent sequencing primers which are used in an example from the present invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Corynebacterium glutamicum nucleic acids encoding and membrane transport proteins or their portions, identifying C. glutamicum or related bacteria, and transformation -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       WPI; 2001-071486/08.

Patent No. 6380370

PATENT INFORMATION:
APPLICANT: Lynn Doucette-Stamm et al
TITLE OF INVENTION: EPIDERMIDIS FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: GTC 07

CURRENT APPLICATION NUMBER: US/09/134,001C

CURRENT FILING DATE: 1998-08-13
PRIOR APPLICATION NUMBER: US 60/064,964
PRIOR FILING DATE: 1997-11-08

PRIOR APPLICATION NUMBER: US 60/055,779
PRIOR APPLICATION NUMBER: US 60/055,779

PRIOR FILING DATE: 1997-08-14

PRIOR FILING DATE: 1997-08-14
